How The Nexgen Brand Makes Your Decision Easier

The purchase of an indoor comfort system is not one to be taken lightly. However, it's one you can make with an air of confidence when you consider all that distinguishes the venerable Nexgen brand.

Comforting Craftsmanship

Innovative engineering, world-class manufacturing processes and the relentless drive to ensure each unit lives up to our uncompromising standards – these attributes define the Nexgen brand and result in the premium performance homeowners have come to expect from an American legend. Assembled in facilities in Texas, Nexgen brand products are built to Last and Last and Last.

Confidence-Inspiring Compressor

With Nexgen brand air conditioners, your comfort and savings start with a high-efficiency compressor designed to provide years of reliable cooling comfort. The compressor is complemented by our durable, high-efficiency condensing coil, which is made with corrugated aluminum fins and refrigeration-grade copper tubing.

The Security Of The Nexgen Brand's Amazing Lifetime Warranties*

To truly seal the deal, NexGen brand indoor comfort systems are backed by industry-leading limited warranties*. The majority of our HVAC products are covered by a Lifetime Unit Replacement Limited Warranty, while all NexGen brand product feature a 10-Year Parts Limited Warranty. Together these warranties combine to offer homeowners a level of purchase protection that's the stuff of legend.

* Complete warranty details available on www.nexgenairandheat.com. To receive the Lifetime Unit Replacement Lifetime Warranty (good for as long as you own your home) and 10-Year Parts Lifetime Warranty, in order to qualify for lifetime replacement warranty you need to be part of the X Protection Family. Membership must be current and up-to-date.

 **Comfortbridge™**
Technology Compatible

When your new air conditioner is paired with an NexGen brand gas furnace with ComfortBridge technology, performance data from the split system is gathered and used to make automatic adjustments that may help reduce the amount of energy used to cool your home.

Always in pursuit of innovative ideas, our engineers have designed ComfortBridge technology to help your entire HVAC system cost-effectively operate at peak performance – providing consistent energy-efficient home comfort. ComfortBridge technology works with any single-stage thermostat to help create customized indoor comfort specifically for you and your family.

Quiet Performance

You can be assured that your Nexgen brand air conditioner will provide you with quiet operation. To minimize operating sounds, we've acoustically engineered our systems with enhancements that include a compressor sound-reduction cover made of high-density foam and a specially designed sound-control top.

Energy Efficiency

Energy efficiency equates to cost savings. Your Nexgen brand ASXC16 Air Conditioner offers up to 17 SEER energy efficiency performance. "SEER" stands for Seasonal Energy Efficiency Ratio, a measure used by the U.S. Department of Energy to rate the cooling efficiency of air conditioners and heat pumps. The higher the SEER, the greater the efficiency – and the lower the operating cost. Compared to lower SEER units found in many homes, a Nexgen brand ASXC16 Air Conditioner can provide significant savings on your electric bill.

A Legacy of Comfort

THE IMPECCABLE REPUTATION OF
AN AMERICAN ORIGINAL

NexGen brand heating and cooling systems are a part of the enduring legacy of one of America's most recognized and respected brands. Originating eight decades ago in NexGen, Iowa, the brand is synonymous with long-lasting, premium quality products — from home appliances to heating and air conditioning equipment. Chances are, you and generations before you have enjoyed the dependable performance and longevity the NexGen brand continues to deliver.

ComfortBridge Technology Compatible

Continuously monitors system performance for customized indoor comfort.

Comfort Speed Technology

Designed to automatically adjust the speed of the compressor and condensing fan motor based on cooling demand — full, 100% capacity for extreme temperatures, and reduced capacity for milder days. A system with Comfort Speed technology may lower your energy costs when compared to a single-speed unit that only runs at 100% on or 100% off.

Copeland® Comfortalert™ Diagnostics

Advanced diagnostics constantly monitor your air conditioner system, reducing failures and pinpointing trouble spots for a fast fix.

Efficient Cooling Capacity

Five millimeter, refrigeration-grade premium copper tubing and aluminum fin condenser coil configuration deliver outstanding heat transfer properties with R-410A refrigerant.

Factory-Installed Inline Filter Drier

Protects the refrigerant system from dirt and moisture for longer service life compared to a unit without a filter drier.

Quiet Operation

Acoustically engineered, high-density sound control blanket helps to reduce noise levels compared to units without sound blankets for years of quiet comfort.

Heavy-Gauge Galvanized Steel Enclosure With Sound-Control Top

With advanced fan design, it provides dependable, quiet airflow across the condensing coil.
